

Sprint 2 Review
Food Now
Sprint Completion: February 21, 2018

Actions to stop doing:

- We should stop being late to scrum meetings. This leads to a bad habit of having longer scrum meetings than needed
- We should stop planning and start coding. This will allow us to start making progress in our project to present at the end of the quarter

Actions to start doing:

- Be more proactive in learning technologies required for project. There are many new technologies we must learn for the project and each team member should start looking into tutorials at least once a day.
- Group/Pair programming. Aside from scrum meetings, we should set up a meeting devoted to actual coding.

Actions to keep doing:

- Keep learning new technologies. There are more to learn for sprint 2, therefore the effort to learn new technology will become crucial.
- Keep communicating with each other. This will allow us to meet up and work on the project

Work completed/not completed:

Completed

- (10) As a developer, I want to implement an algorithm to suggest food so the user will be able to find what they need
- (10) As a developer, I want to use React.js so the page will look user friendly
- (6) As a user, I want to select my preferences so that I can find the food that best fits my needs
- (5) As a user, I want to make a user-friendly UI so that I can navigate the application easily

Not Completed

- (10) As a user, I want a home/login/signup page so I can log into my account

Work completion rate:

- Total user stories completed: 4
- Total work hours completed: 25
- Total days during sprint: 14
