

Sprint 3 Plan

Product name: Food Now!

Team name: 170 + 1

Sprint Completion Date: March 4, 2018

Goal: Continue working on tidying up the website, passing more user parameters to the back-end to make better Yelp API calls, and integrate a database for users.

Task listing:

(8) As a user, I want to click on the necessary UI elements to provide Food Now! with my specific parameters.

- Task 1 (3 hours): Add more UI elements to the screen.
- Task 2 (2 hours): Add data from front-end elements to a JSON object so back-end can make the necessary Yelp API calls.

(5) As a user, I want some form of login, so I can save restaurants I enjoyed from Food Now!

- Task 1 (4 hours): Create a database of users.
- Task 2 (3 hours): Connect database to web application.

(8) As a user, I want to see what restaurant Food Now! has selected from me.

- Task 1 (2 hours): Randomly select restaurant from returned list.
- Task 2 (2 hours): Send user to a new page after Yelp API has returned a restaurant.

Team Roles:

- *Ryan Shee (PO)*: back-end engineer
- *Armin Anderson*: user login engineer
- *Bryan Ko*: back-end engineer
- *Jasper Yeh*: front-end engineer
- *Jerry Liu*: back-end engineer
- *Joshua Shier*: front-end engineer

Task Assignments:

- *Ryan Shee (PO)*: Grab more data from front-end to pass to Yelp API
- *Armin Anderson*: Set up database of users
- *Bryan Ko*: Grab more data from front-end to pass to Yelp API
- *Jasper Yeh*: Continue adding more UI elements for users
- *Jerry Liu*: Grab more data from front-end to pass to Yelp API
- *Joshua Shier*: Continue adding more UI elements for users
