

Release Plan
Food Now!
Release 1.0.0
January 21, 2018

Team Memeber: Ryan Shee (PO), Armin Anderson, Bryan Ko, Jasper Yeh, Jerry Liu, Joshua Shier

High Level Goals: Find places to eat quickly based on user's preference. Users will have the option to save places they've been to for future reference.

User Stories:

Sprint 1

- (8) As a developer, I want to use Yelp's API so that we have data to give to the user
- (5) As a developer, I want to use MongoDB so that we can have a database of all users
- (8) As a user, I want find places to eat easily so that I don't have to spend a lot of time searching for places
- (3) As a user, I want a login page so I can log into my account
- (3) As a user, I want a sign up page so I can save my previous search

Sprint 2

- (10) As a developer, I want to implement an algorithm to suggest food so the user will be able to find what they need
- (10) As a developer, I want to use React.js so the page will look user friendly
- (6) As a user, I want to select my preferences so that I can find the food that best fits my needs
- (5) As a user, I want to make a user-friendly UI so that I can navigate the application easily

Sprint 3

- (4) As a developer, I want to polish the code so that it's easier to read
- (3) As a user, I want to make an account so I can save my search history
- (3) As a user, I want to mark favorites so I can go back to the places I like
- (7) As a user, I want to see what restaurant Food Now! has selected for me
